Bullnose	400 x 400 x 40mm	N/A	14.5kg each	43.2 LM

COLOUR RANGE*

Cream

Noosa Sands

Steel

*Due to natural resources used in production there are slight colour variations between batches. Pool copings can differ in appearance to the body tile and mixing 2 different sizes can end up with slight variations. Colour swatches are a guide only. Samples you receive may also be slightly different to what is received. Coastal Stone pavers should be laid with approximately 2-3mm gap due to thickness variation. Must be laid on soft sand base. This product has a V2 Variance rating.
